# EFS

Siddesh Mandhare

27/8/24

Problem statement-
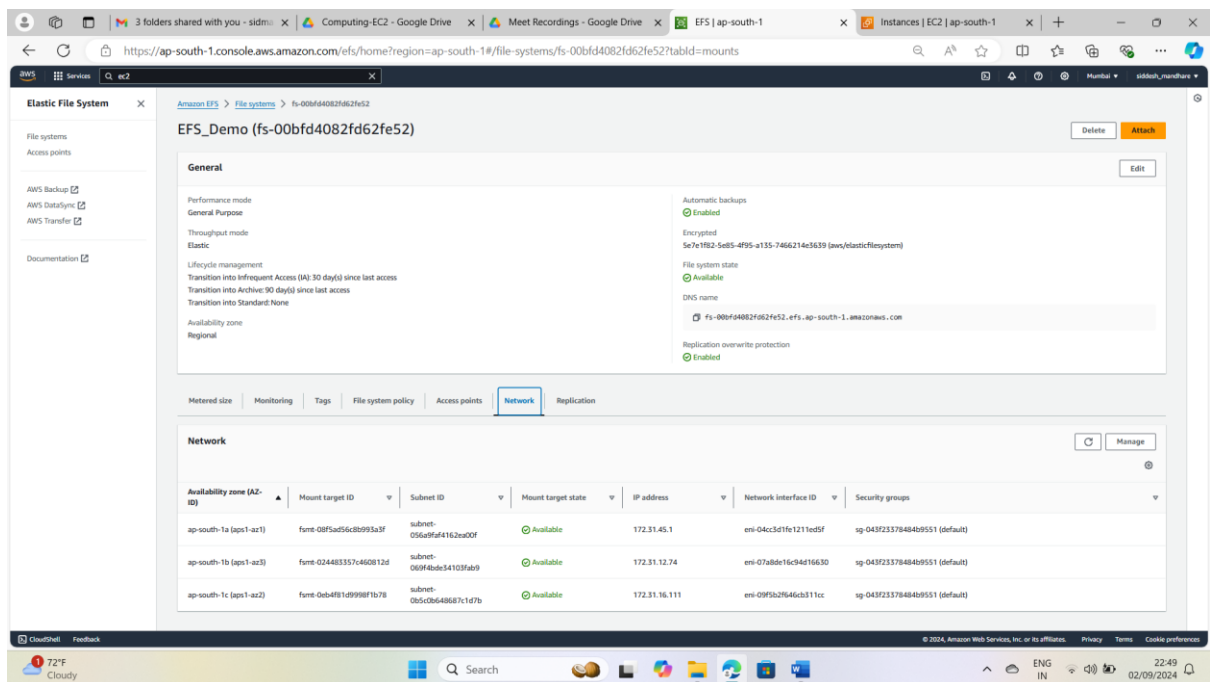

Requirement

1) **Create EFS File system**
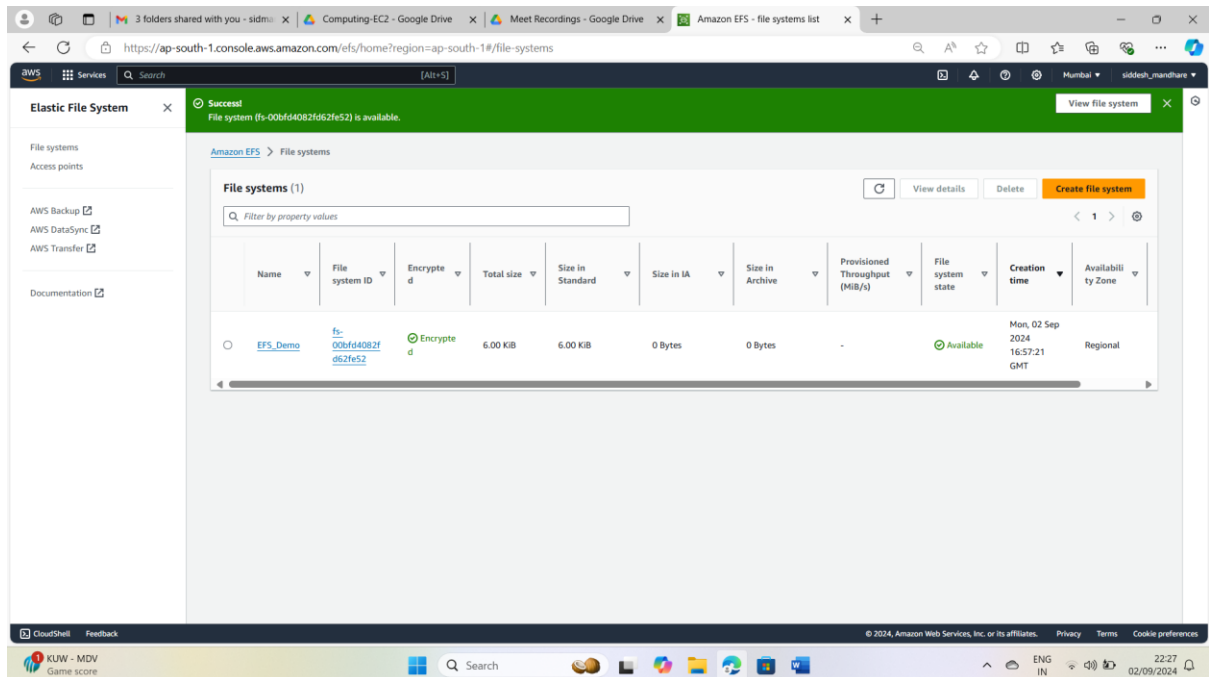

2) **Create two instances in different zone(1a &1b), add one security group with 2049 (nfs) port**
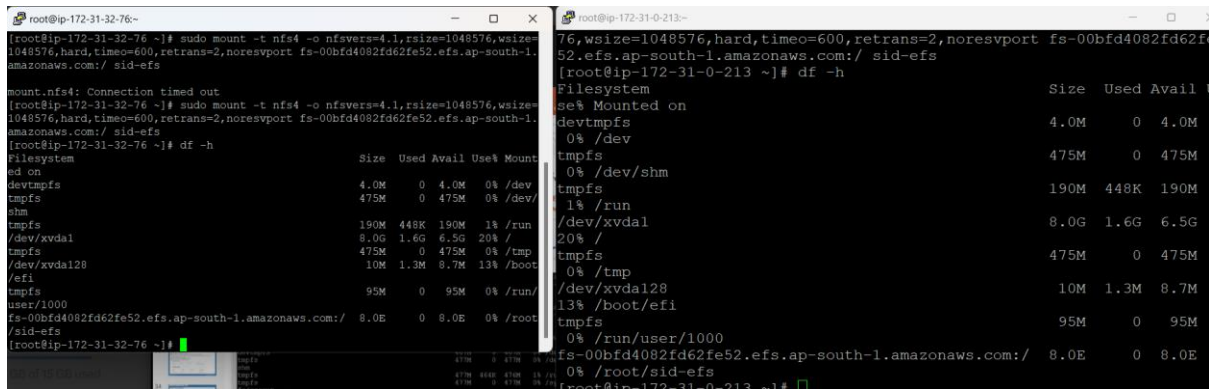

3) Mount Security group on created EFS files

4) Mount EFS file system for both EC2 instances

5) EFS have been successfully mounted on VM

6) Both files can access at 2 different region
